

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	3 October 2026
Team ID	SWTID-2026-4184
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Spreadsheet Data Preparation	Prepare structured employee data in Excel/Google Sheets with Employee ID, Employee Name, Email, Department and Location.
FR-2	Custom Target Table	Create Employee Test (u_employee_test) and configure the required employee fields on its form.
FR-3	Import Set Table	Load the spreadsheet into Employee Import (u_employee_import) as the staging/import table.
FR-4	Transform Map	Create Sample Spreadsheet Import, select Employee Import as source and Employee Test as target, and map source fields to target fields.
FR-5	Transform & Validate	Run the Transform and verify that imported records are created in Employee Test; check the successful transformation.
FR-6	Duplicate Prevention	Enable Coalesce on an appropriate field so repeated imports update matching employee records instead of inserting duplicates.
FR-7	Repeated Data Import	Load additional Excel data into the existing Employee Import table and process it using the configured Transform Map.
FR-8	Reporting & Dashboard	Create reports and an Employee Analytics Dashboard to provide visibility into the imported employee data.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The workflow provides defined ServiceNow navigation and step-by-step configuration for loading, mapping, transforming and validating employee data.
NFR-2	Security	Not explicitly specified in the source document.
NFR-3	Reliability	Data integrity is validated after transformation, and Coalesce prevents duplicate employee records during repeated imports.
NFR-4	Performance	The project is intended to migrate bulk employee data efficiently and accurately using Import Sets and Transform Maps.
NFR-5	Availability	Not explicitly specified in the source document.
NFR-6	Scalability	The source describes bulk employee-data imports and repeated imports using the existing Import Set and Transform Map.
