

Project Design Phase

Problem – Solution Fit Template

Date	3 october 2026
Team ID	SWTID-2026-4184
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- Solve complex problems in a way that fits the state of your customers.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- Understand the existing situation in order to improve it for your target group.

Template:

1. CUSTOMER SEGMENT(S) ServiceNow administrators / users who need to import employee spreadsheet data into ServiceNow.	6. CUSTOMER CONSTRAINTS Requires correctly structured source fields, correct source-to-target mappings and a suitable matching field for Coalesce. Budget/device/network constraints are not specified in the source.	5. AVAILABLE SOLUTIONS Excel/Google Sheets plus ServiceNow Load Data, Import Set, Transform Map, Auto Map/Mapping Assist, Transform History, Coalesce, reports and dashboard.
2. JOBS-TO-BE-DONE / PROBLEMS Import employee data accurately; map source fields to target fields; transform and validate records; prevent duplicates during repeated imports.	9. PROBLEM ROOT CAUSE Employee data starts in a spreadsheet while target records must match the ServiceNow table structure, requiring controlled staging, mapping and transformation; repeated imports also require duplicate handling.	7. BEHAVIOUR Prepare spreadsheet → create Employee Test table → load data → configure Transform Map → map fields → Transform → verify results → repeat imports → use Coalesce → create reports/dashboard.
3. TRIGGERS 4. EMOTIONS: BEFORE / AFTER A new employee spreadsheet needs to be loaded; additional/changed employee data must be imported; imported records need verification.	10. YOUR SOLUTION Use ServiceNow Import Set + Transform Map: load spreadsheet into Employee Import, map to Employee Test, transform/validate, use Coalesce for matching records, and monitor through reports/dashboard.	8. CHANNELS of BEHAVIOUR ONLINE: ServiceNow web interface—Load Data, Import Sets, Transform Maps, Transform History, reports/dashboard. OFFLINE: Excel/Google Sheets preparation and spreadsheet file selection.
