

Project Development Phase

Model Performance Test

Date	3 october 2026
Team ID	SWTID-2026-4184
Project Name	Import Data using Transform Maps
Maximum Marks	4 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

No.	Parameter	Values	Screenshot
	Model Summary	ServiceNow Import Sets and Transform Maps workflow for employee data management using an external spreadsheet, Employee Import staging table, Employee Test target table, Transform Map, Transform History, reports and Employee Analytics Dashboard. Note : If imported data matches the configured mapping and validation rules, records are transformed into the target table; otherwise the import/transform history can show unsuccessful rows.	 Phase 5: Transform Data & Validate Navigation: Open Employee Test Table from application navigator as shown below. As our import got succeeded, all the records are created in the Employee Test Table.
	Accuracy	Source-supported validation: - Transform Map field mapping is checked during transformation. - Employee Test records are verified after transformation. - Transform History is reviewed for inserted, updated and ignored rows. The source does not provide a numerical training accuracy or validation accuracy percentage.	 - Now the State is completed and Success. - Now again click on the Transform history then it shows the newly added data and its status of Inserted and Skipped values over the given data.
	Confidence Score (Only Yolo Projects)	Not applicable to this project. The supplied source describes ServiceNow data import, transformation, validation and reporting. It does not use a YOLO/object-detection model and does not define a confidence score.	 PHASE 9 : Add Reports to Dashboard Create Dashboard Navigation : - Open All menu -> Search for Dashboards. - Under Self Service -> Click Dashboards. - On the top right corner Click Create Dashboard or / - You can create directly by using the backend name [PS_DASHBOARD.FORM]. - Then Click New to Create new Dashboards.

Source basis: Import Data using Transform Maps (Spreadsheet). Numerical model-performance metrics are not specified in the source.
