

Acceptance Testing

UAT Execution & Report Submission

Date	3 october 2026
Team ID	SWTID-2026-4184
Project Name	Import Data using Transform Maps
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to summarize the user-acceptance-oriented test coverage supported by the supplied project source for the Import Data using Transform Maps workflow. The report focuses on spreadsheet loading, transformation, validation, duplicate prevention, repeated imports, reporting, and dashboard output.

2. Defect Analysis

The supplied source document does not provide a defect log, severity classification, or counts of resolved/closed defects. Therefore, no defect counts are invented in this report. The source does document validation and repeated-import outcomes.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

3. Test Case Analysis

The source describes a sequence of functional checks and demonstrations. Exact pass/fail counts are not provided, so the table records the documented test areas and their source-supported outcome rather than inventing numeric results.

Section	Total Cases	Not Tested	Fail	Pass
Spreadsheet Preparation	1	0	0	Demonstrated
Employee Test Table	1	0	0	Demonstrated
Employee Import / Load Data	1	0	0	Demonstrated
Transform Map & Field Mapping	1	0	0	Demonstrated
Transform & Validation	1	0	0	Demonstrated
Coalesce / Duplicate Prevention	1	0	0	Demonstrated
Repeated Import	1	0	0	Demonstrated
Reports & Dashboard	1	0	0	Demonstrated

Test Case Analysis — Continued

Section	Total Cases	Not Tested	Fail	Pass
Transform History	1	0	0	Demonstrated
Employees by Department Report	1	0	0	Demonstrated
Employees by Location Report	1	0	0	Demonstrated
Employee List Report	1	0	0	Demonstrated
Employee Analytics Dashboard	1	0	0	Demonstrated

4. Source-Documented Import Outcomes

The source documents a repeated-import scenario in which four rows were uploaded: two new employee IDs were inserted and two existing employee IDs were updated with changed values. When the same sheet was uploaded again, the four rows were ignored, demonstrating the intended Coalesce behavior for repeated data.

Import Scenario	Rows	Inserted	Updated	Ignored
New/changed employee data import	4	2	2	0
Same sheet imported again	4	0	0	4

5. Open Issues / Limitations

The source does not provide a formal defect list, numerical performance measurements, external API test results, or production security test results. These areas are therefore marked as not specified rather than being assigned unsupported values.

Source basis: Import Data using Transform Maps (Spreadsheet).
